

# Related Activities at the 16<sup>th</sup> FIGON Dutch Medicines Days 2014

## Plenary Lecture - Monday:

*Category: Immunopharmacology*

- **Dopamine and SUL-121 protect kidney against in vivo hypothermia/rewarming-induced injury via the CBS/ H<sub>2</sub>S pathway**

G.J. Dugbartey, F. Talaei, M. Goris, M.C. Houwertjes, P.C. Vogelaar, H.R. Bouma, R.H. Henning

## Posters:

*Category: Drug Formulation, Delivery and Targeting*

- **Poster 017**

**Dopamine and SUL-121 protect against DNA damage during cellular hypothermia and rewarming in cultured smooth muscle cells**

M. Tolouee, G. Trentadue, A.C. van der Graaf, P.C. Vogelaar, R.H. Henning

*Category: Signal Transduction & Pharmacology*

- **Poster 080**

**Exploration of anti-inflammatory and broncho-relaxing properties of SUL-121**

B. Han, W.J. Poppinga, H. Zuo, G-J. Euverink, R.H. Henning, P.C. Vogelaar, A.C. van der Graaf, H. Meurs, M. Schmidt

- **Poster 097**

**A new class of compounds for the protection of cells during storage at 2- 8°C**

P.C. Vogelaar, A.C. van der Graaf, R.H. Henning, S. Stienstra
